TOYOTA GR COROLLA

CATCH CAN INSTALLATION GUIDE

1. Jack up the car, secure the car on axel stands, disconnect the battery.

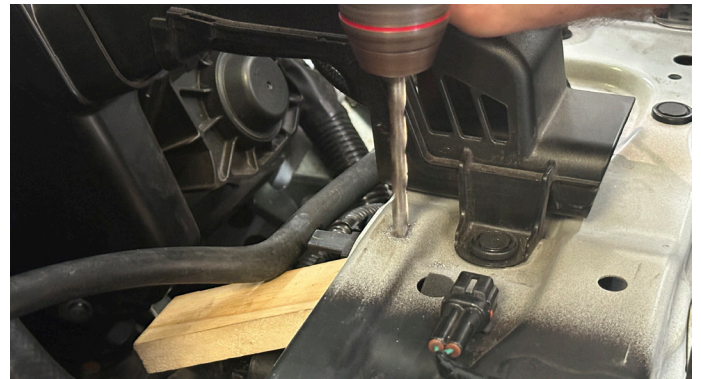

2. Remove the plastic front tray as per OEM instructions.

3. Locate the bolt hole just above the bonnet release. Using this as a guide, offer up the bracket and mark the opposing bolt hold for drilling.

4. Carefully drill out the newly marked hole. Take care to not drill to deep through the whole. (using a small length of wood will protect the underside of the drilling)

5. Attach the catch can to the bracket using the supplied hardware. Attach the bracket & catch can assembly to the newly drilled hole.

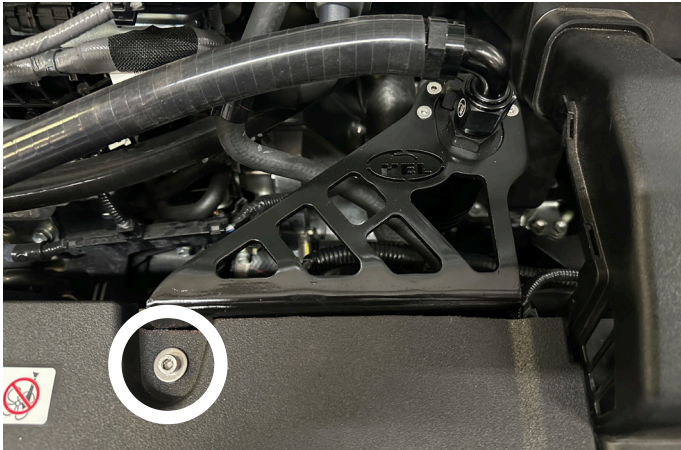

TOYOTA GR COROLLA

CATCH CAN INSTALLATION GUIDE

6. Re-attach the front tray, and install the bolt back through the left side of the catch can bracket. Attach both the hoses to the catch can, and route them out to the left side, as seen in the image.
(90° top port, 150° side port)

7. Remove the engine cover. Locate the valve cover breather hose and disconnect it at both ends.

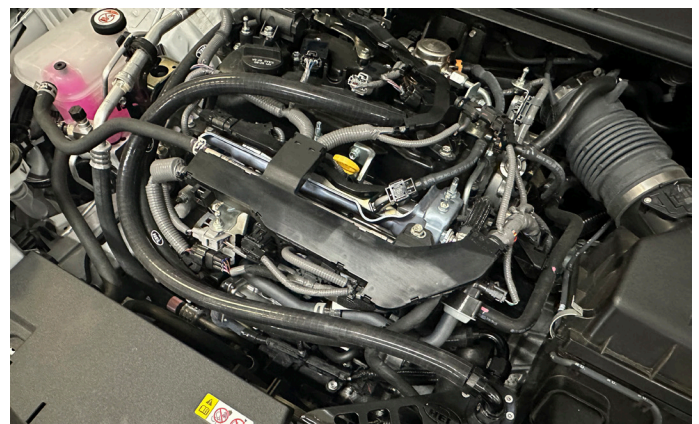

8. Re-using the factory retaining clip from the 90 degree breather hose end, install the longer silicone hose to the intake pipe.

9. Install the remaining hose to the valve cover port.

10. Route the hoses as shown in the picture below.

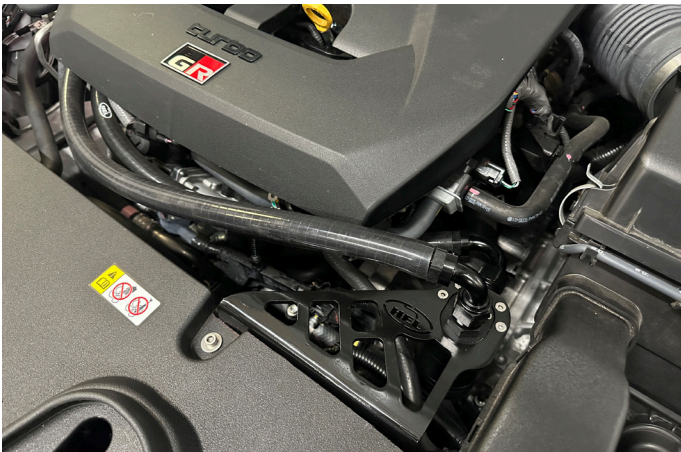

TOYOTA GR COROLLA

CATCH CAN INSTALLATION GUIDE

11. Re-install the engine cover.

Now it's time to grab a drink... sit back... and admire your new catch can kit from HEL PERFORMANCE.
